

- **Induction Lighting is a 120 year old technology**
- **Today's energy market place requires high consumption of energy in both peak and off peak times for commercial buildings**
- **Induction lighting can in-fact reduce consumption directly at the source by 50-90%**
- **Replace out t-8, all fluorescent sources, metal halide and high pressure sodium + other incandescent sources with induction lights.**
- **Our finance model offsets a large injection of dollars with term financing that is 100% deductible.**
- **Manufacturers Bank has provided us with this resource services to our clientele**
- **Élan Financing is our source for all term financing with retrofitted induction lamps**
- **Our underwriter backs these services with a 5 year warranty on product**  
**Specialty pricing on large projects 500k to 1mm**
- **Energy company rebates vary by state**
- **ADG has support in all 50 states and is the California and North Carolina Distributor**
- **Our sales support in Washington, Chicago, Gainesville and other locales deal with the energy companies that provide up to 80% credits for induction lights by ADG sales staff.**
